

# MicroNex GO

High precision variable DC power supply

Simple, reliable, and user-friendly

Ultra-compact travel friendly design

Simple battery swap design

## Features:

- Output current and voltage: 0-5A / 0-15V
- Output current/voltage resolution: 1mA / 1mV
- Output current accuracy:  $\pm 0.5\%$  + 5 digits
- Output voltage accuracy:  $\pm 0.5\%$  + 3 digits
- 1.44-inch HD wide angle front panel colour LCD
- Full control from front panel controls
- Constant current/constant voltage
- Current and voltage limiter
- Custom 3D printed compatible enclosure for easy battery exchange
- Easy connection output binding posts
- Ultralightweight design: 210g (excluding battery)
- Ultracompact design: 80 x 95 x 110 mm (excluding battery)

## Suitable for:

- ✓ Cathodic protection anode testing
- ✓ Fault finding
- ✓ Temporary ICCP anode energisation
- ✓ Hybrid anode energisation

### Compatible model options:

Please contact us for further battery options

**Makita**

**ozito X PXC Einhell**

**BOSCH**

Note: MicroNex Go is not an official product of the battery manufacturers.
